

# SAFETY ALERT

## Severe Weather Warning - Secure your site now

**Strong winds expected in Queensland over the next few days. Please take the necessary precautions and prepare your site now.**

The follow topics are to be considered when developing a Severe Weather Plan for their site.

This list is not comprehensive

- Scaffold planks have been secured.
- Secure any loose materials and ensure a thorough clean up has occurred with rubbish removed from site.
- Secure all electrical power tools in a weatherproof lock up.
- Ensure building products have been properly strapped and stored safely.
- All mobile plant has been stored safely i.e. cranes, elevated work platforms.
- Site security fencing and hoarding properly secured.
- Secure dangerous goods and substances.
- Secure incomplete structures to prevent collapse. i.e. block walls.

**Post severe weather event  
Full site safety audit prior to the commencement of work with mandatory inspections of the following areas:**

- Scaffolding
- Formwork screens
- Electrical
- Mobile Plant
- Amenities
- Site access and egress
- Site security
- Ensure the appropriate personal protection equipment is worn during clean-up i.e. rubber work boots and gloves
- Clean drinking water
